

**KNIGHT MANAGEMENT
INSURANCE SERVICES, LLC**

RLP/SLI INTERFACE MODULE

The AutoInsure Interface module provided by Bluebird Auto Rental Systems interacts with your Auto Rental program to automatically enroll your customers into the Knight RLP and/or SLI insurance programs when the customer elects those coverages. The AutoInsure Interface module eliminates the need to separately account for your insurance sales and ensures that your customers are actually covered at the point of sale. On-line enrollment is a condition of coverage under the RLP and SLI insurance policies. This authorization will confirm that you specifically authorize Bluebird Auto Rental Systems to install the AutoInsure Interface module onto your Auto Rental program, and that Knight Management Insurance Services, LLC, will be responsible for all costs and expenses to Bluebird Auto Rental Systems.

AUTHORIZATION

I, hereby, authorize Bluebird Auto Rental Systems, to install and maintain the AutoInsure Interface module into our Auto Rental program system-wide. Bluebird Auto Rental Systems is further authorized to provide information relating to RLP and/or SLI insurance only to Knight Management Insurance Services, LLC.

I understand that all costs and expenses relating to the AutoInsure Interface module will be paid exclusively by Knight Management Insurance Services, LLC.

This authorization will remain in effect until revoked in writing by me.
