

**KNIGHT MANAGEMENT  
INSURANCE SERVICES, LLC**

**RLP/SLI INTERFACE MODULE**

The RLP/SLI Interface module provided by TSD interacts with your Rent 2000 Rental Management Software program to automatically enroll your customers into the Knight RLP and/or SLI insurance programs when the customer elects those coverages. The RLP/SLI Interface module eliminates the need to separately account for your insurance sales and ensures that your customers are actually covered at the point of sale. On-line enrollment is a condition of coverage under the RLP and SLI insurance policies. This authorization will confirm that you specifically authorize TSD, Inc., to install the RLP/SLI Interface module onto your Rent 2000 Rental Management Software, and that Knight Management Insurance Services, LLC, will be responsible for all costs and expenses to TSD, Inc.

**AUTHORIZATION**

I, hereby, authorize TSD, Inc., to install and maintain the RLP/SLI Interface module into our Rent 2000 Rental Management Software system-wide. TSD, Inc., is further authorized to provide information relating to RLP and/or SLI insurance only to Knight Management Insurance Services, LLC.

I understand that all costs and expenses relating to the RLP/SLI Interface module will be paid exclusively by Knight Management Insurance Services, LLC.

This authorization will remain in effect until revoked in writing by me.
